# Contents

**Preface: Diagnosis and Management of Neck Masses** ix  
David E. Webb

**Contemporary Use of Imaging Modalities in Neck Mass Evaluation** 1  
John N. St.J Blythe, Oliver J. Pearce, Elizabeth A. Tilley, and Peter A. Brennan

- Anatomic classification of the neck 1  
- Consultation appointment 2  
- Imaging modalities in the assessment of neck lumps 2  
- Specific neck lumps 6  
- Practical challenges 11  
- Summary 14

**Pediatric Neck Masses** 15  
William J. Curtis and Sean P. Edwards

- History and physical examination 15  
- Initial workup 15  
- Initial treatment 16  
- Surgical treatment 16  
- Demonstration of common procedures 17

**Neck Infections** 21  
Brent A. Feldt, David E. Webb

- Etiology 21  
- Anatomy 21  
- Microbiology 21  
- Diagnosis 21  
- Imaging 22  
- Treatment 24  
- Complications 27  
- Summary 28

**Hematopoietic Neck Lesions** 31  
Joshua E. Lubek, Amro Shihabi, Laura A. Murphy, and Jason N. Berman

- Preoperative planning 31  
- Limitations of fine-needle aspiration biopsy 32  
- Open biopsy surgical technique 32  
- Patient positioning 32  
- Relationship of the spinal accessory nerve and the internal jugular vein at the skull base 34  
- Wound closure and immediate postoperative care 34  
- Caveats and potential complications 34  
- Clinical results in the literature 34  
- Summary 37
