Contents

Preface: Up-to-Date on Orbital Trauma and Reconstruction xi
Leander Dubois and Alfred G. Becking

Anatomy of the Orbits: Skeletal Features and Some Notes on the Periorbital Lining 1
Carl Peter Cornelius, Florian Probst, Marc Christian Metzger, and Peter J.J. Gooris

Introduction 1
Orbital cavity—bony skeleton 1
Systematic skeletal description 1
Geometric concept 1
Orbital walls 1
Bony openings—fissures, canals, grooves, foramina, and connections encountered during periorbital dissection 5
Optic canal 5
Superior orbital fissure 5
Cranio-orbital foramen 5
Inferior orbital fissure 5
Foramen rotundum—maxillary strut—pterygoid (Vidian) canal 7
Ethmoidal foramina 7
Infraorbital foramen 7
Supraorbital and frontal foramina/notches 7
Zygomatico-orbital, zygomaticofacial, and zygomaticotemporal foramina 7
Nasolacrimal groove/canal 7
Internal orbital buttresses 7
Orbital dimensions, volume, surface contours, and 3-dimensional globe position—interrelationship 7
Anterior orbit—midorbit—posterior orbit (apex) 10
Deep orbit versus rule of halves: 24 to 12 to 6 10
Orbital soft tissue contents 10
Orbital septum 10
Periorbita—periosteal lining—periorbitum 11
Dissection of the periorbital lining 12
Ciliary ganglion 13
Clinics care points 17
Acknowledgments 18
Disclosure 18

Ocular Injury and Emergencies Around the Globe 19
Gijsbert J. Hötté and Ronald O.B. De Keizer

Introduction 19
Retrobulbar hemorrhage and orbital compartment syndrome 19
Etiology and clinical assessment 19
Treatment: lateral canthotomy and cantholysis 19
Orbital compartment syndrome and imaging 20
Trauma to the globe 21
Ocular examination 21
Evidence-Based Decision Making in Orbital Fractures: Implementation of a Clinical Protocol

Peter J.J. Gooris, Jesper Jansen, J. Eelco Bergsma, and Leander Dubois

Introduction
Patient presentation on admission
The role of orthoptic evaluation
Decision making
Recovery
Case 1
Case 2
Case 3
Case 4
Case 5
Pearls and pitfalls
Clinical results in the literature
Summary
Clinics care points
Disclosure

Secondary Corrections of the Orbit: Solitary Fractures

Harald Essig, Maximilian Eberhard Hermann Wagner, and Michael Blumer

Introduction: nature of the problem
Surgical technique
Preoperative planning
Preparation and patient positioning
Surgical approach
Surgical procedure
Potential complications
Pearls and pitfalls
Immediate postoperative care
Rehabilitation and recovery
Clinical results in the literature
Summary
Disclosure

Secondary Correction of Midface Fractures

Jonathan Chodroff, Nadir Elias, Michael Whitcomb, Cong Vo, and Richard Bryan Bell

Introduction
Secondary correction of enophthalmos
Secondary correction of the zygomaticomaxillary complex
Advanced Concepts of Orbital Reconstruction: A Unique Attempt to Scientifically Evaluate Individual Techniques in Reconstruction of Large Orbital Defects

Ruud Schreurs, Alfred G. Becking, Jesper Jansen, and Leander Dubois

Introduction 151
Materials and methods 151
  Conventional transconjunctival reconstruction (study 1) 152
  Reconstruction with transsinusoidal endoscopy (study 2) 152
  Reconstruction with virtual surgical planning (study 3) 154
  Reconstruction with intraoperative imaging (study 4) 154
  Reconstruction with intraoperative image-guided navigation (study 5) 154
  Reconstruction with intraoperative marker-based navigation (study 6) 154
  Reconstruction with intraoperative real-time navigation (study 7) 155
Results 155
  Conventional transconjunctival reconstruction (study 1) 155
  Reconstruction with transsinusoidal endoscopy (study 2) 156
  Reconstruction with virtual surgical planning (study 3) 156
  Reconstruction with intraoperative imaging (study 4) 156
  Reconstruction with intraoperative image-guided navigation (study 5) 156
  Reconstruction with intraoperative marker-based navigation (study 6) 160
  Reconstruction with intraoperative real-time navigation (study 7) 160
Discussion 160
Clinics care points 161
Disclosure 161
