Preface: Temporomandibular Joint Surgery: Fascinating but Tackling Difficulties	xi
Florencio Monje	
Magnetic Resonance Imaging of the Temporomandibular Joint	129
José M. López-Arcas, David González-Ballester, José L. Del Castillo, Elena Salvador	
Introduction	129
Radiological anatomy	129
Temporomandibular joint MRI protocol	129
Temporomandibular joint pathology: findings in MRI	130
Temporomandibular joint MRI safety issues	133
Clinics care points	135
Athrocentesis	137
Dorrit W. Nitzan, Hadas Lehman Naaman	
Arthrocentesis technique	137
Arthrocentesis—Mode of action	139
The role of arthrocentesis in various temporomandibular joint disorders	140
Clicking joint	140
Limited mouth opening	141
Open lock versus temporomandibular joint condylar dislocation	142
Osteoarthritis	142
Other inflammatory diseases, hemarthrosis, and infection	143
Clinics care points	143
Disclosure	143
Usual and Nonusual Findings in Temporomandibular Joint Arthroscopy	147
Reem H. Hossameldin	
Introduction	147
Content	147
Summary	156
Clinics care points	157
Lysis and Lavage	159
Manuel Moreno-Sánchez, Florencio Monje	
 Video content accompanies this article at http://www.oralmxsurgeryatlas.theclinics.com.	
Introduction	159
Surgical technique	159
Patient position	159
Preparation	159
Surgical approach	159
Surgical procedure	160
Potential complications	161
Clinical results in the literature	162
Summary	164
Clinics care points	164
Disclosure	164
Temporomandibular Joint Arthroscopic Surgical Techniques	165
Fernández Sanromán Jacinto, Sembronio Salvatore	
 Video content accompanies this article at http://www.oralmxsurgeryatlas.theclinics.com.	

Contents

Surgical indications	166
Synovitis	166
Adhesions	166
Disc Mobilization	166
Disc Perforations	166
Bone pathologies	169
Synovial chondromatosis	169
Joint Hypermobility	169
Complications	172
Clinics care points	172
Disclosure	172
Arthroscopic Disc Repositioning Techniques of the Temporomandibular Joint	175
Raúl González-García, Rafael Martín-Granizo	
 Video content accompanies this article at http://www.oralmaxsurgeryatlas.theclinics.com.	
Introduction	175
Surgical technique	176
Preoperative planning	176
Preparation and patient positioning	176
Surgical approach	176
Surgical procedure	176
Unique suture	177
Posterior traction suture	177
Rotating curved suturing tip	179
Double-pass suture	179
Double suture	179
Potential complications	181
“Pearls and pitfalls”	181
Immediate postoperative care, rehabilitation, and recovery	181
Clinical results in the literature	182
Summary	182
Arthroscopic Disc Repositioning Techniques of the Temporomandibular Joint Part 2: Resorbable Pins	185
Rafael Martín-Granizo, Raúl González-García	
Introduction	185
Surgical technique	185
Preoperative Planning	185
Preparation and Patient Positioning	186
Surgical Approach	186
Surgical Procedure	186
Advantages and disadvantages	187
Potential Complications	187
“Pearls and Pitfalls”	188
Immediate postoperative care, rehabilitation, and recovery	189
Summary	190
Clinical results in the literature	191
Temporomandibular Joint Surgery	193
Piero Cascone, Fabrizio Spallaccia, Valentino Vellone	
Introduction	193
Surgical technique	193
Preoperative planning	193
Prep and patient positioning	193

Surgical approach	194
Surgical procedure	194
Potential complications	195
Pearls	196
Pitfalls	197
Immediate postoperative care	197
Rehabilitation and recovery	197
Clinics care points	197
Disclosure	198
Open Temporomandibular Joint Surgery	199
Andrew J. Sidebottom	
Introduction	199
Outcomes following discectomy with NO interposition	199
Outcomes following discectomy WITH interposition	200
Proplast-Teflon	200
Silicone	200
Fossa hemi-arthroplasty	200
Temporalis myofascial graft	201
Auricular cartilage	201
Free fat	202
Dermis-fat graft	202
Summary	202
Clinics care points	203
Conflict of interest	203
Unilateral Condylar Hyperactivity	205
Laura Villanueva-Alcojol, Alberto Cuevas Queipo de Llano	
Introduction	205
Epidemiology	205
Cause	205
Classification	205
Diagnosis	206
Histology	206
Treatment	206
Surgical technique	209
Preoperative planning	209
Surgical approach	209
Postoperative care: rehabilitation and recovery	210
Clinics care points	215
Autogenous Reconstruction of the Temporomandibular Joint	217
Nadeem R. Saeed, Barbara Gerber	
Introduction	217
Methods of autogenous (biological) reconstruction	217
Gap/interpositional arthroplasty	217
Vascularized grafts	218
Nonvascularized Grafts	218
Advantages and Disadvantages of Autogenous Grafts	221
Summary	221
Clinics care points	221
Disclosure	221

Alloplastic Reconstruction of the Temporomandibular Joint in Patients with Dentofacial Deformities	223
Gary Warburton, Louis G. Mercuri	
Introduction: nature of the problem	223
Preoperative planning	223
Temporomandibular joint alloplastic device selection and design	223
Virtual surgical planning	223
Sequencing combined temporomandibular joint reconstruction and orthognathic surgery	225
Surgical preparation in the operating room	226
Surgical approaches and implantation procedure	227
Surgical access	227
Condylectomies and coronoidectomies	227
Setting the occlusion into the intermediate splint	227
Implantation of the alloplastic devices	228
Closure of the surgical sites	228
Maxillary orthognathic surgery and genioplasty, if needed	230
Rehabilitation and recovery	230
Pearls and pitfalls	231
Clinical cases	233
Summary	233
Clinics care points	233
Tissue Engineering in Temporomandibular Joint Reconstruction	235
David Faustino Ângelo, Florencio Monje	
Introduction	235
Animal model for temporomandibular joint tissue engineering	235
Study design for preclinical temporomandibular joint tissue engineering	236
The rationale for temporomandibular joint tissue engineering	238
Tissue-engineered implants	239
Summary	244
Clinics care points	244
Disclosure	244
Funding	244
Physiotherapy in the Postoperative Period of Temporomandibular Joint Surgery	247
Alfonso Gil-Martínez, Josué Fernández-Carnero, Susan Armijo-Olivo	
Introduction	247
Physiologic impact of the surgery related to physical therapy management	247
Indications/contraindications for physical therapy	247
Beginning and end of physiotherapy treatments	248
Physiotherapy approaches	248
Immediate postsurgical period	248
Techniques based on the representation of movement	248
Lymphatic drainage	248
Postsurgical thermotherapy (cryotherapy)	249
Limitation of mobility	249
Alteration of motor control and instability	250
Hypoalgesic techniques	250
Therapeutic patient education	251
Neurophysiology	251
Advertisements/information	252
Self-management	252
Referral	254
Summary	254
Clinics care points	254
